

Fully Funded Ph.D. Positions @ Applied Cryptography Research Group - USF

Funding: The student receives a yearly package worth of ~\$60,000 covering the tuition, health insurance, and a competitive monthly pay (with low taxes and no state tax). The summer teaching and industrial internship are possible. USF is a Rank-1 Research School, and USF-CSE is in top 15% in USA Computer Science (public universities) based on AAD Scholarly Research.

- **Secure & Trustworthy Clouds and Databases**
 - Searchable Encryption, Oblivious RAM
 - Secure Genetic Databases

- **Trustworthy Machine Learning TML**
 - Adversarial Machine Learning
 - Multi-Party Computation TML
- **Trustworthy Cryptocurrencies**
 - Blockchain Systems for Cybersecurity
 - Crypto Currencies
 - Quantum-Safe Blockchains
- **Secure and Reliable Internet of Things (IoT)**
 - Quantum-Safe for Smart-Grids
 - Cryptographic Drone Frameworks
 - Trusted Computing Platforms
 - Lightweight Cryptography for IoT
