

FSM UPnP invisible proxy

Proxy in promiscuous mode

*SSDP message can be alive, byebye, or discovery answer.

**P21 is because the proxy took over too early or the service wakes up by itself.

*** TCP message can be of several types.

•Eventing: SUBSCRIBE (new subscription or renewal), UNSUBSCRIBE.

•HTTP GET to get XML scheme or presentation HTML

•SOAPAction request

Proxy wakes up service when receiving any of these messages.
